Syskor Group

Based in Vitoria-Gasteiz (Spain) and founded in 2007, **Syskor** is a leading brand in the design, manufacture and sale of **hardware and components** for the kitchen and furniture industry.

We put at your disposal the most complete range of technical solutions for aluminum sliding systems and kitchen hardware servicing the **furniture industry and distributors, hardware stores, cabinetmakers** and **DIY**.

home group

Syskor Design

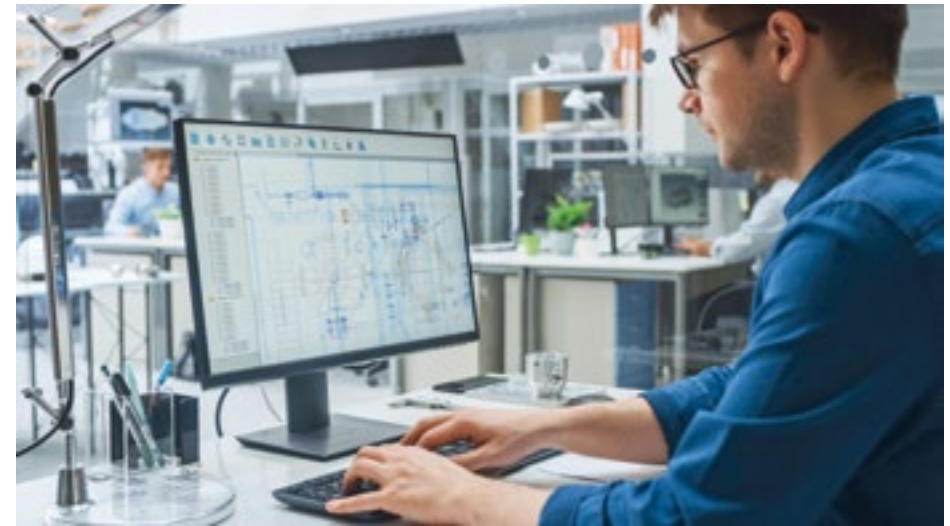

We constantly analyze **new trends**. We design and develop functional technical solutions that allow the manufacture of **beautiful, durable, practical and reliable furniture**.

Industrial Technology

State-of-the-art manufacturing technology and processes for efficient, **safe and reliable** products. As a responsible company, we produce respecting the strictest **environmental and social standards**. We take care of people and nature, **we take care of you**.

Premium quality

We seek the optimal quality suitable for your **distribution needs**, as well as the **manufacture and assembly** of the **furniture and its subsequent use**.

Full range of solutions

We offer you a **complete range of functional fittings** that allow the manufacture of all kinds of furniture. We offer you the best solution for **every need and area of the house**.

Efficient integrated logistics

All our hardware is **available immediately**, 15000 square meters of modern logistic facilities for a **quick response** and **faultlessly**. We have in stock what you need for your business.

Fast and personal service

We satisfy your needs with an **immediate and personalized service**. We support you every day with vocation and dedication: **Your business is of our interest**.

Slim Box 89

- Modern **slim box** design with straight lines for maximum use of the space and ease of cleaning.
- Special finishes in **anthracite grey and satin white** for maximum durability and corrosion resistance.
- Heavy duty frame and mechanisms for perfect functioning (40 kgs maximum load).
- 3D front adjustments.
- Extra silent and smooth soft closing feature.
- 60,000 cycles.
- Regulations in:
 - Height: ± 2 mm
 - Width: ± 1 mm
 - Front angle: 4 mm

* Packing: 1 kit box

Each kit contains all the components to make one drawer
(front, rear and bottom panels not included).

Advantages:

1. Few kits cover most industry needs.
2. All components in one kit reduce handling costs and number of mistaken references.

Kit composition:

1. Soft closing slides.
2. Double metal sides.
3. Front fixing pieces.
4. Front fixing screws.
5. Neutral side covers.
6. Rear bottom support piece

SYSKOR

Ultra and Cosmos Collection

Syskor presents its **new production** of **Ultra** and **Cosmos** cutlery trays. Functional collections of great versatility and with **bases adapted** to the size of most of the **major brands of kitchen drawers** on the market

From our **new industrial division of thermoforming**, we offer a comprehensive service of **development, personalized design, tools and production** of cutlery holders adapted to the kitchen, bathroom and furniture industry. An **experienced production team** and cutting-edge **thermoforming technology** allow us to offer the best solutions up to the highest quality standards.

Carefully designed, the studied distribution of our cutlery trays guarantees **optimal use of space** and easy access to all cutlery.

Composition: **thermoformed polystyrene**.

Available sizes: **300 to 1200 mm** wide drawers.

Versions for **16 mm and 19 mm** thickness sides.

Standard finishes: **Anthracite - White - Grey**.

Designs and finishes **customized** to the needs of the client.

Technical drawing of a rectangular frame assembly. The drawing shows a cross-section of the frame with various dimensions and labels. The overall width is labeled LW . The distance between the inner vertical supports is labeled $SKW=LW-42$. The distance between the outer vertical supports is labeled $16_{(Max.)}$. The height of the frame is labeled 37 . The distance between the inner horizontal supports is labeled 27 . The distance between the outer horizontal supports is labeled 21 . The distance between the inner and outer horizontal supports is labeled $10-13$. The distance between the inner and outer vertical supports is labeled $2 (Min.)$. The drawing also shows a small detail of a corner joint.

Technical drawing of a cabinet edge showing seven different profiles. The profiles are labeled with their part numbers and dimensions on the right side. The drawing includes various dimensions and labels for the profiles.

Labels and dimensions on the right side (from top to bottom):

- NL
- 250(10")
- 270(10.8")
- 300(12")
- 350(14")
- 400(16")
- 450(18")
- 500(20")
- 550(22")

Dimensions and labels on the left side (from top to bottom):

- Ø 6.3
- 9
- 32
- 64
- 32
- 12
- 32
- 9

Dimensions at the bottom (from left to right):

- 64
- 96
- 128
- 32
- 4
- 37

Other labels in the drawing include "Cabinet edge" at the top and "R" (radius) for some profiles.
